Work Experience

Full Stack Engineering Senior Analyst
Accenture 03/2022 – 02/2024 | Bangalore, India

- Guided and collaborated with front-end teams to enhance user interfaces and overall user experience.
- Led development activities, supported code quality through peer reviews, and mentored team members.
- Documented technical processes and configurations to support knowledge sharing and future development.
- Projects: Microsoft Copilot Transcription and Translation, Avanade Enterprise Chat, Microsoft Viva Oracle Connector, and CIBC @Home Application.

Full Stack Engineering Analyst
Accenture 10/2020 – 02/2022 | Mumbai, India

- Developed and maintained backend APIs for meeting management and notification services.
- Optimized database performance through schema design and data modeling.
- Executed unit tests to validate backend service reliability and efficiency.
- Implemented real-time features using Redis Cache and SignalR to improve responsiveness.
- Collaborated on code reviews, debugging, and code-quality improvements.
- Projects: Telehealth Virtual Visits and MSK Telemedicine.

Education

Master's in Computer Engineering
Universität Paderborn 04/2024 – Present
Paderborn, North Rhine-Westphalia, Germany

Bachelor's in Information Science Engineering
SDMCET 08/2016 – 09/2020
CGPA: 8.59/10 Dharwad, India

Technical Skills

Languages: C#, C++, JavaScript, SQL
Frameworks: .NET, ReactJS
Cloud: Microsoft Azure
Other: Databases, Object-Oriented Programming (OOP)

Projects

Microsoft Copilot Transcription and Translation
11/2023 – 02/2024

- Developed and tested a solution integrating audio and video file processing with Microsoft Teams and email notifications.
- Addressed backend limitations, managed cloud resources, and delivered changes under tight deadlines.
- Documented Function Apps and Azure cloud configurations.

Telehealth Virtual Visits 07/2021 – 03/2022

- Developed and optimized backend services using Azure and .NET 6, integrating Redis Cache and SignalR for real-time updates.
- Implemented APIs, notifications, and event-driven functions to improve performance and user experience.
- Used time triggers, Event Hubs, and Cosmos DB triggers to process real-time meeting details.

Achievements

ACE Award – Microsoft Viva Oracle Connector
06/2023

- Led three junior developers and supported another team with Moodle integration.

ACE Award – CIBC @Home Application
01/2023

- Developed backend services and contributed to frontend work for the CIBC @Home app.
