WORK EXPERIENCE

Full stack engineering Senior Analyst

Accenture

03/2022 - 02/2024, *Bangalore, India*

Achievements/Tasks

- Guided and collaborated with front-end teams to enhance user interfaces and overall user experience.
- Managed and led development teams, ensuring high-quality code through peer reviews and mentoring.
- Documented technical processes and configurations to support knowledge sharing and future development.
- Projects Involved - **Microsoft Copilot Transcription and Translation, Avanade Enterprise Chat, Microsoft Viva Oracle Connector, CIBC@Home Application.**

Full stack engineering Analyst

Accenture

10/2020 - 02/2022, *Mumbai, India*

Achievements/Tasks

- Developed and maintained backend APIs for meeting management and notification services, ensuring seamless functionality.
- Optimised database performance through effective schema design and data modeling practices.
- Executed unit tests to validate the reliability and efficiency of backend services.
- Implemented real-time data features using Redis cache and SignalR, significantly improving system responsiveness.
- Collaborated with senior developers on code reviews, debugging, and improving overall code quality.
- Projects Involved - **Telehealth Virtual Visits, MSK Telemedicine.**

EDUC ATION

Masters in Computer Engineering

Universität Paderborn

04/2024 - Present, *Paderborn, North Rhine-Westphalia, Germany*

Bachelors in Information Science Engineering

SDMCET cgpa - 8.59/10

08/2016 - 09/2020, *Dharwad, India*

SKILLS

dotnet | Microsoft Azure cloud | C# | SQL | Javascript | reactjs | Database | C++ | OOPs

PROJECTS

Microsoft CopilotTranscription and Translation (11/2023 - 02/2024)

- Developed and tested the Microsoft Copilot Transcription and Translation solution, integrating audio and video file processing with Microsoft Teams and email notifications. Addressed backend limitations, managed cloud resources, and handled changes under tight deadlines.
- Documented function apps and Azure cloud configurations comprehensively.

Telehealth Virtual Visits (07/2021 - 03/2022)

- Developed and optimized backend services for the Telehealth Virtual Visits platform using Azure and .NET 6, integrating Redis cache and SignalR for real-time data push. Implemented APIs, notifications, and event-driven functions, significantly enhancing performance and user experience.
- Utilized time triggers, event hubs, and CosmosDB triggers to handle and enhance real-time meeting details.

ACHIEVEMENTS

ACEaward - MicrosoftViva Oracle Connector (06/2023)

Led a team of 3 junior developers on the Oracle connector project and provided crucial support to another team working on Moodle integration.

ACE award - CIBC @Home Application (01/2023)

Developed backend services and contributed to frontend work for the CIBC @Home app.
